

Who We Are

OEG is a global Leading technology company in Power, Process and Water Industry providing one stop turnkey solutions including basic & detailed engineering, Planning, project management, procurement, construction, EPC, operations and maintenance for various industries and segment.

We are associated with the best technology partners and principals in the market to ensure right products and services are delivered to the client meeting the requirements.

Operations & Maintenance – Power

OEG has emerged as one of the Leading and preferred Operations and Maintenance Service Provider in India and Abroad.

A competitive environment places stiff challenges in the path of companies in terms of cost, quality, and technology and market position. In view of this, companies have to place more responsibility on service providers to reap maximum benefits in terms of quality and quantity. Service providers who can take up complete ownership of the equipment / assets of a plant are in great demand.

Operations And Maintenance – IPP

OEG has been at the forefront of Operation & Maintenance for more than a Decade. Our portfolio of over 4000 MW of projects spread across India and Abroad.

Operations And Maintenance – CPP

Captive Power plants are operated in wide range of Industrial Facilities for Power Generation. The plants may operate in grid parallel mode with the ability to export surplus power to the local electricity distribution network/for their own consumption.

Large industrial facilities have set up captive power generation to mitigate the effect of Electricity Tariff charged by electric utility, poor reliability of electric supply, forced outages, long power cuts, etc.,

OEG Specialize in Operating and Maintaining the CPP's with the vast knowledge base. And has one of the largest portfolios in O&M in India.

Operations And Maintenance – Green

The delivery of solar power is very critical to maintain no disruption to have a stream of economic value. At OEG, we believe proper Maintenance is a critical component to ensure optimal performance while minimizing the risks of downtime.

We have a dedicated team of Field-Service Engineers and qualified Technicians who will actively oversee the quality and performance of a solar plant with effective maintenance catering to the specific requirements of our Clients and also enhance their optimum profitability.
